

Pan-European Regulatory Alpha, Procurement & Insider Flow
European regulatory shifts, public procurement awards, and executive transactions move billions in market capitalization daily. AltDataEU continuously captures and normalizes this disparate data exhaust across 27 EU member states, standardizing records directly to traded tickers, ISINs, and LEIs.

Core Product Pillars

?? Statutory Lobbying & Meetings Velocity Daily declared spend brackets, active lobbyist FTEs, and meeting logs across the EU Transparency Register, German Bundestag, and 20+ national registers.	?? Public Procurement (TED & Tenders) Direct feeds of awarded EU public contracts and defense tenders (€2T+ market), mapped to winning parent corporate tickers and CPV codes.
?? Executive Insider Trades (MAR Art. 19) Normalized European director dealings (buys/sells/options) delivered sub-second with aggregate executive sentiment metrics.	?? Major Holdings & Revolving Door Track 5%+ institutional ownership threshold crossings and former politicians transitioning into corporate advisory boards.

The Entity Resolution Engine (Zero Look-Ahead Bias)

From Fragmented Government Strings to Liquid Traded Tickers:
Our algorithmic graph maps obscure local subsidiaries, trade coalitions, and regional declarants to standard **LEIs (ISO 17442) and ISINs** (e.g. defense procurement to RHM.DE, aerospace to AIR.PA, pharma to NOVO-B.CO). Every single row includes an immutable `point_in_time_ingested_at` UTC timestamp to eliminate data leakage in quantitative backtesting.

Factor Strategies & Macro Use Cases

- Defense & Aerospace Procurement:** Correlate Bundestag and EU defense lobbying spikes with unannounced TED procurement contract wins.
- Pharma & Healthcare Pricing:** Track national health ministry dossiers and executive transactions surrounding drug approval directives.
- Energy Transition & Green Subsidies:** Monitor corporate lobbying on carbon border tariffs and industrial subsidy distribution.

Delivery Channels & Commercial Tiers

Tier	Delivery Method	Scope & Latency	Pricing
Quant Research Desk	REST API (/api/v1/*)	Full API access, 1-year history, daily delta syncs	€990 / month
Enterprise Fund License	Snowflake Secure Share / S3 Parquet	Zero-copy direct SQL, full historical backtest, sub-100ms WebSocket stream, custom mappings	€2,500 – €3,500 / mo
